Data will not be shown for counties with fewer than three deaths.

The bar chart displays the daily count of deaths in the United States from March 2020 to August 2020. The vertical axis, labeled 'Number of Deaths', scales from 0 to 80 in increments of 20. The horizontal axis marks the first of each month from April to August. The data shows a period of low mortality in March and April, followed by a steady rise in May. A major surge occurs in July, with a peak of approximately 78 deaths in early July. After this peak, the daily death toll declines significantly through August, returning to near-zero levels by the end of the month.

Gender	Percentage
Male	57%
Female	43%

Age Group	Number of Vaccinated People
<20y	11
20-44y	200
45-54y	230
